Quarterly Morbidity & Activity Report

Vol.IV, Issue IV (October - December, 2011)

March, 2012

Editorial

With the advent of modern medicine in the country, the Royal Government of Bhutan wisely decided to adopt a system of free health care for its citizens. This has now been mandated by the Constitution of Bhutan. The free health system has thus far produced commendable population health outcomes and health equity given Bhutan's relatively small economy and stage of development. While Bhutan may not be in the league of countries with high performing health systems, it is one of the few countries in the world providing free health services to all its citizens in the most equitable manner.

But, Bhutan's health care expenditure is skyrocketing and competing priorities from other sectors on our already limited resources is growing by the day. The need for prudent use of available resources has become ever more important if Bhutan is to continue providing free health care services and further improve its quality of care.

One of the effective tools of improving efficient use of resources is undoubtedly through promotion of high quality research and use of research evidences for developing sound policies and interventions. There is an urgent need to identify priority research areas of national importance and to promote the culture of research and use of research evidences to ensure that our limited resources are used in the most efficient and cost-effective manner.

## 1. Mortality

Total deaths of 1043 people have been recorded in the year 2011 across all health facilities

Figure 1a: Total deaths reported from health facilities by all causes (Jan-Dec 2011)

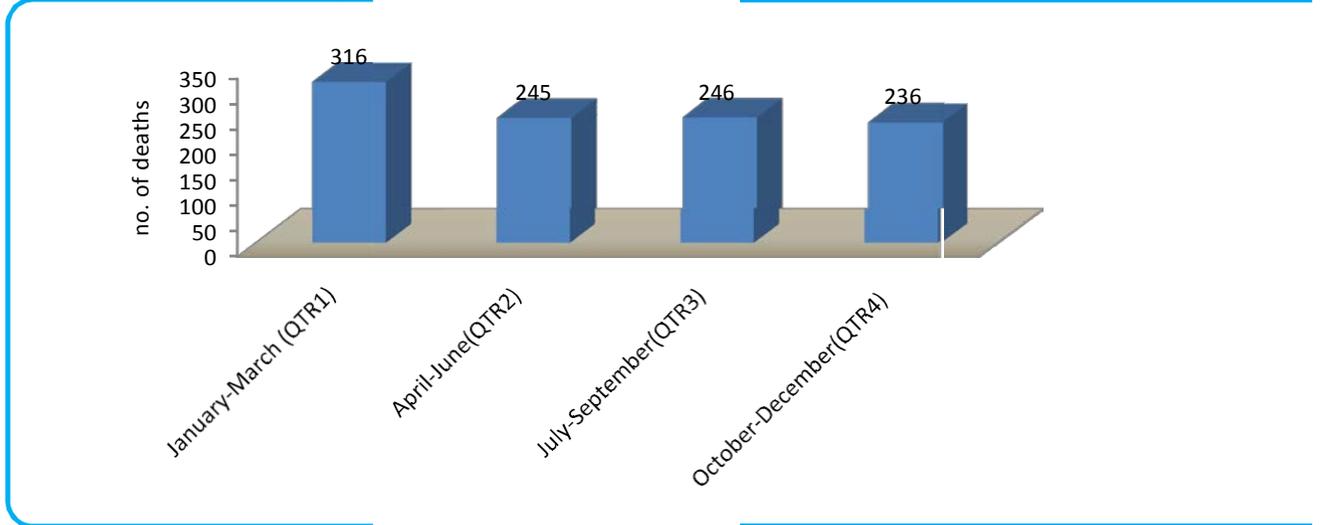

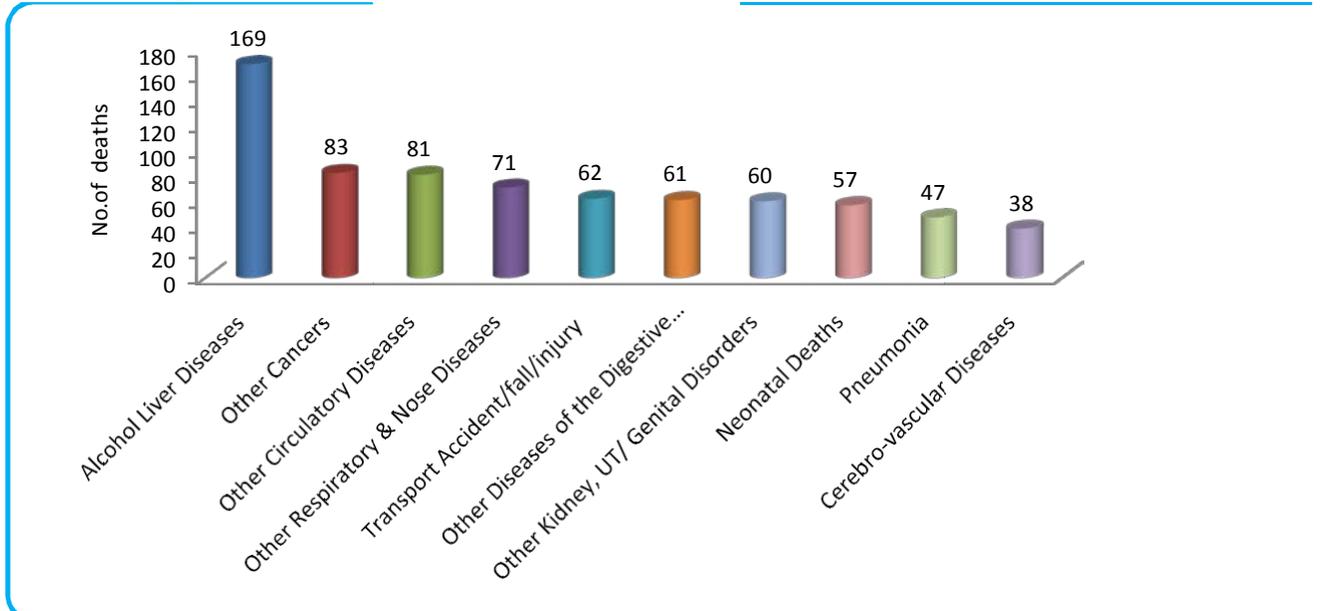

Figure 1b: Top ten causes of mortality reported from health facilities (Jan-Dec, 2011)

Note: For definitions and list of diseases/conditions under 'Other', please refer to Bhutan Management and Health Information System (BMHIS) Manual (2009) available from BMHIS, Planning and Policy Division, Ministry of Health, Bhutan

## 2. Top Ten Morbidity

Figure 2a: Top ten morbidities reported from health facilities in Bhutan (Jan-Dec, 2011)

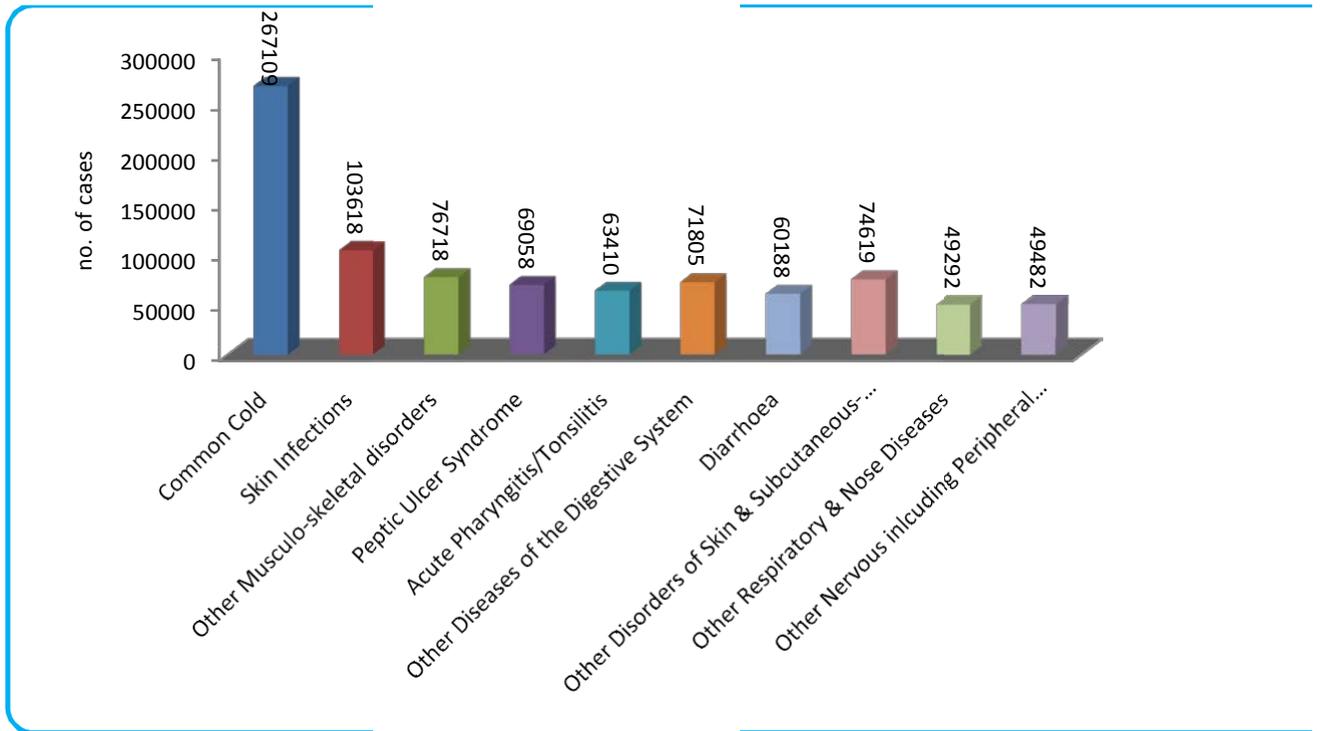

Figure 2.b: Top 10 causes of morbidity by region (Jan-Dec, 2011)

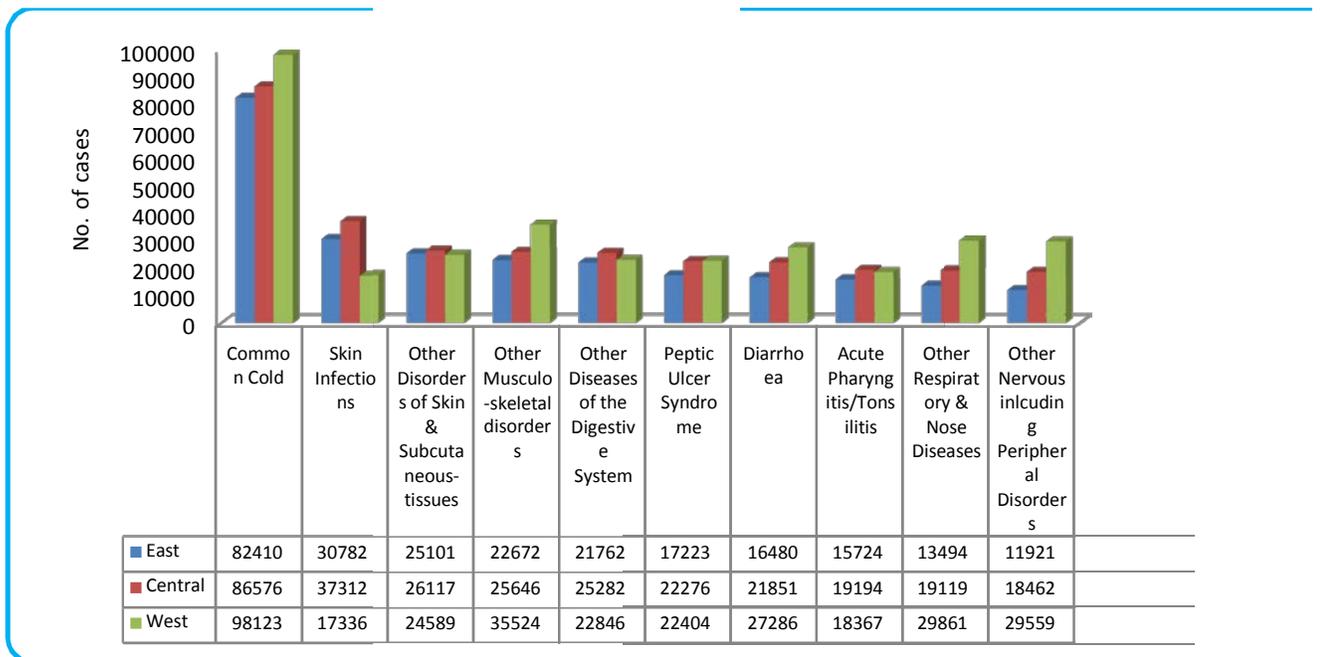

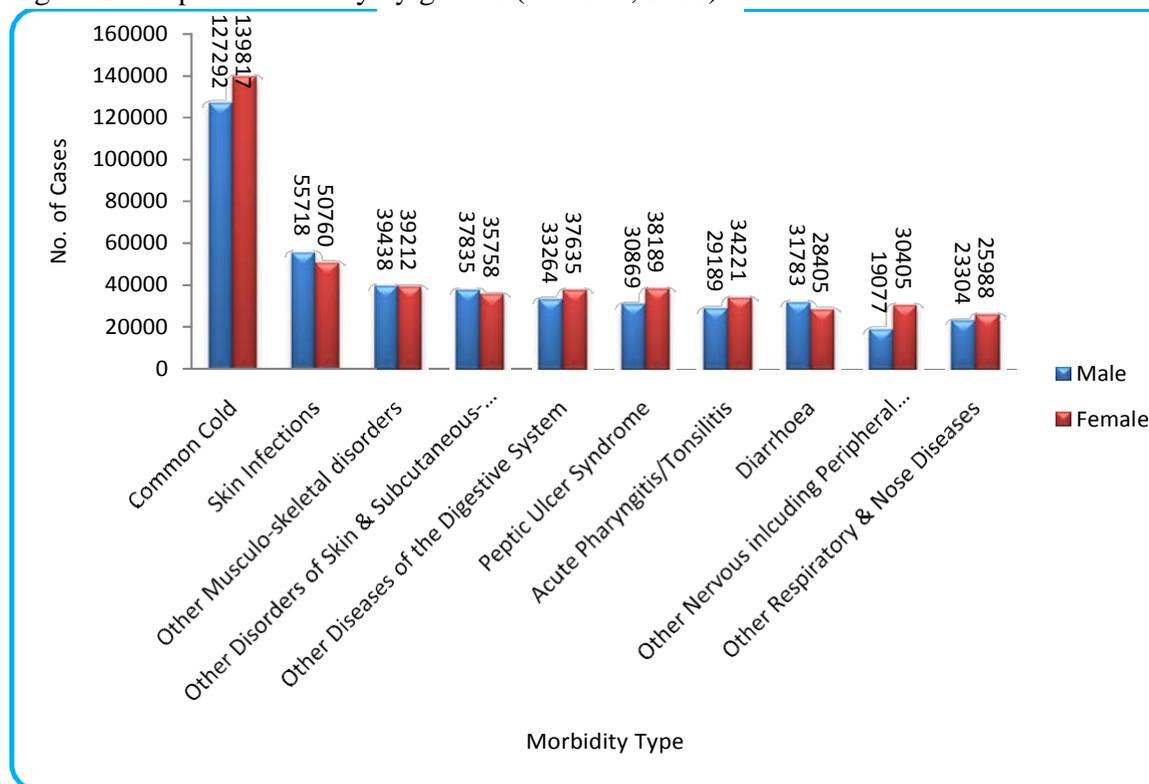

Figure 2c: Top 10 Morbidity by gender (Jan-Dec, 2011)

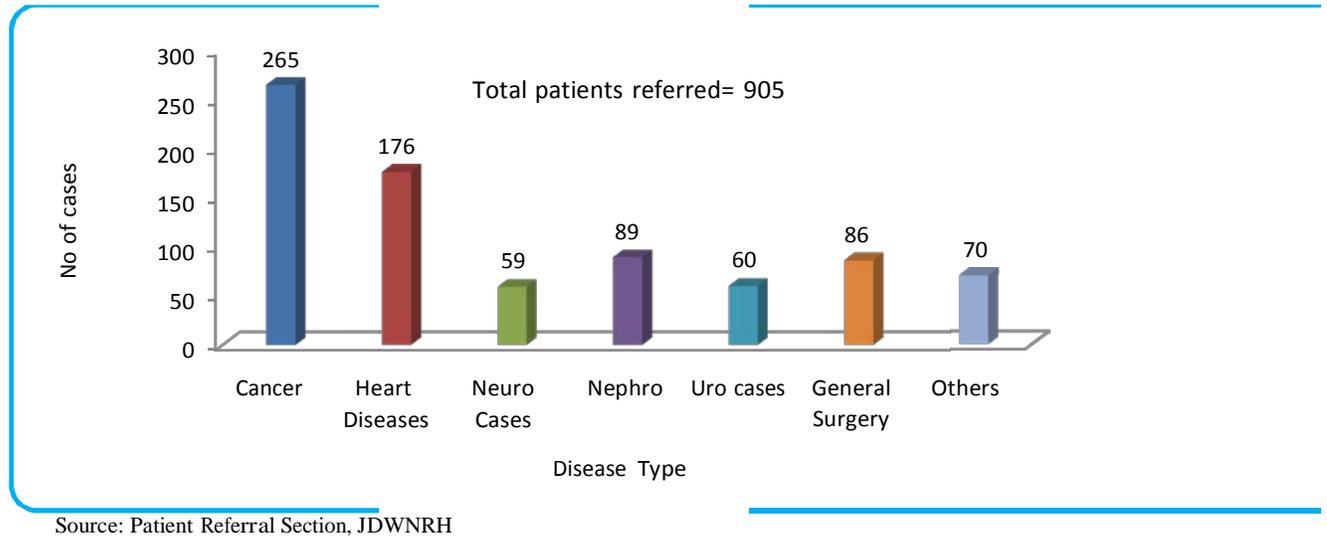

### 3. Patient Referrals ( Jan-Dec2011)

Table 1: Patients referred to Regional and National Referral Hospitals in Bhutan.

Health Facility	Qtr.1	Qtr.2	Qtr.3	Qtr.4	Total
JDWNRH	434	490	458	555	1937
MRRH	263	324	227	258	1027
GRRH	140	129	171	147	587

As expected, Jigme Dorji Wangchuck National Referral hospital (JDWNRH) received 54% of all in country referral cases for tertiary care followed by Mongar Regional Referral Hospital (MRRH) with 28% and Gelephu Regional Referral hospital (GRRH) with 12%.

Figure 3a: Total patients referred to India for treatment (July 2010-June 2011)

The Referral Committee of JDWNRH referred a total of 905 patients from July 2010-June 2011. Of the referred patients, 265 (29%) were cancer patients. Of the cancer patients, cervical and oronasalpharynx cancers topped the list with 41 and 34 patients respectively. Among the Heart and kidney patients, Rheumatic Heart Disease (46 patients) and End Stage Renal Diseases (30 patients) were the leading causes.

Table 2: Patients Referral Costs to India (July 2010-June 2011)

Place of Referral	Nu. in Millions
Kolkatta	64,536,268
Chennai	36,419,712
Guwahati	2,401,592
Total	103,357,572/-

Total	3047	3090	2910	2718	5364	2495

6. Deliveries attended by health workers and use of forceps/vacuum among attended deliveries by Dzongkhags (Oct.-Dec., 2011)

Dzongkhag	Home	Facility	Forceps/Vacuum
Bumthang	5	48	0
Chukha	19	263	3
Dagana	3	36	0
Gasa	2	0	0
Haa	0	6	0
Lhuentse	13	19	0
Mongar	17	270	13
Paro	0	121	1
Pemagatshel	7	24	0
Punakha	0	142	12
SamdrupJongkhar	21	140	7
Samtse	4	130	3
Sarpang	5	182	0
Thimphu	5	1004	8
Trashigang	13	101	0
TrashiYangtse	6	19	0
Trongsa	3	16	0
Tsirang	0	72	0
Wangdi	28	91	0
Zhemgang	8	27	0
Total	159	2711	47

In the fourth quarter, there were a total of 2870 deliveries attended by trained health workers. Of these, only 5.54% of the births were attended in private homes. It is important to note that the above table represents only deliveries attended by health workers and it doesn't include unattended home deliveries.

7. Post-Natal Care Visits by Dzongkhags (Oct.-Dec., 2011)

Dzongkhag	1st Visit	2+ Visit

Total	1230	55955	2036	217

## 13. Number of new diabetes cases and related deaths by Dzongkhags (Oct.-Dec 2011)

Dzongkhag	Cases	Death
Bumthang	1	1
Chukha	151	0
Dagana	56	0
Haa	1	0
Lhuentse	0	0
Mongar	8	1
Paro	6	0
Pemagatshel	7	0
Punakha	1	0
SamdrupJongkhar	16	1
Samtse	12	0
Sarpang	303	0
Thimphu	385	5
Trashigang	177	0
TrashiYangtse	2	0
Trongsa	2	0
Tsirang	2	0
Wangdi	32	0
Zhemgang	2	0
Total	1164	8

A total of 1164 new cases of diabetes were diagnosed in the fourth quarter of 2011.

Note: some old cases might have been reported as new by the health facilities especially when patients do not produce old prescriptions (the patients hand book) nor declare their status in their subsequent visits to the health facilities.

## 14. Laboratory Report for Tuberculosis (Oct.-Dec 2011)

Gender	No. sputum examined (A)	No. of people with sputum smear +ve (B)	% smear +ve
Male	792	58	7.32
Female	675	49	7.26
Total	1467	107	7.29

## 15. New and re-treatment cases of TB (Oct.-Dec 2011)

Gender	Pulmonary positive				Pulmonary negative	Extra Pulmonary	Total	Case finding indicators A/(A+E+F) *100
	New (A)	Relapse (B)	Failure (C)	Default (D)	New (E)	New (F)
